

KAVYA K

Software Engineer • React.js • Next.js • Node.js • TypeScript • Immediate Joiner

kavyak6999@gmail.com | +91 8903184518 | linkedin.com/in/kavya-k-1b623918b | kavya-k-portfolio.vercel.app

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience designing and building scalable, high-performance web applications across the stack, with React.js, Next.js, and TypeScript on the front-end and Node.js on the back-end. Skilled in UI architecture, reusable component design, REST/GraphQL API integration, and application state management with Redux. Strong focus on performance optimisation (SSR/SSG), WCAG accessibility, responsive cross-browser development, and modern frontend testing practices with Vitest and React Testing Library. Anthropic-certified in AI-assisted development (Claude Code in Action) and experienced embedding tools such as Claude AI and Cursor into daily engineering workflows to accelerate delivery while maintaining code quality. Immediate joiner.

TECHNICAL SKILLS

- Front-End: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Responsive UI Development, State Management (Redux, Redux-Saga, Redux Toolkit), UI Architecture & Design, Micro-Frontend Architecture, Accessibility (WCAG / A11y), SEO, Performance Optimisation (SSR/SSG)
- Back-End: Node.js, RESTful APIs, GraphQL, SQL, PostgreSQL, Stripe Payment Integration, Microservices & System Design, Database Design & Integration
- Tools & Testing: npm, Yarn, Postman, VS Code, Vite, Webpack, Vitest, React Testing Library
- Cloud & DevOps: Docker, AWS, Jenkins, Kubernetes (K8s), Vercel, CI/CD, Git, GitHub, Version Control
- AI Integration & AI-Assisted Development: AI/LLM Integration, AI Agents, RAG, Claude AI, Cursor, ChatGPT, Gemini — rapid prototyping, debugging, code review, documentation
- Practices & Collaboration: Agile, Scrum, Code & Design Reviews, Cross-Functional Collaboration, Technical Documentation

CERTIFICATIONS

- Claude 101 — Anthropic
- Claude Code 101 — Anthropic
- Claude Cowork — Anthropic
- Claude Platform 101 — Anthropic
- Claude Code in Action — Anthropic

PROFESSIONAL EXPERIENCE

TartLabs → KodeAstra

May 2023 – Present

Software Engineer | Coimbatore

TartLabs was restructured into KodeAstra in Aug 2025; continued in the same role, team, and projects without interruption.

- Architect and maintain scalable, reusable component libraries in React.js and Next.js, reducing UI development time and improving consistency across multiple B2C products.
- Develop and ship production-grade B2C web applications using React.js, Next.js, TypeScript, and JavaScript (ES6+).
- Champion clean, maintainable code and consistent UI patterns across cross-functional projects.
- Integrate RESTful APIs and third-party services with robust error handling; diagnose and resolve complex production API integration issues.
- Implement Stripe payment gateway integration for cart and checkout flows, ensuring reliable, secure transaction handling.
- Manage application state using Redux and Redux-Saga; investigate and resolve difficult state-related bugs and performance bottlenecks.
- Optimise application performance through SSR, SSG, and lazy loading, improving page-load speed and overall user experience.
- Implement technical SEO enhancements using JSON-LD structured data and modern Next.js rendering strategies.
- Deliver WCAG-compliant, accessible interfaces including keyboard navigation, screen-reader support, Dragon Speech compatibility, and colour-contrast standards.
- Debug and troubleshoot complex frontend issues, identifying root causes and delivering lasting fixes.
- Lead dependency upgrades and package management using Yarn and npm; conduct code reviews and drive frontend technical decisions.
- Collaborate cross-functionally with Product, Design, Backend, and QA teams throughout the full development lifecycle.
- Leverage AI-assisted development tools (Claude AI, Cursor) to accelerate feature delivery, improve code quality, and streamline documentation and debugging workflows.

Fabevy

Oct 2022 – Apr 2023

Web Developer Intern | Chennai

- Developed responsive, cross-browser-compatible web pages using HTML, CSS, and JavaScript with clean, maintainable code.
- Built reusable frontend UI sections and optimised layouts for multiple screen sizes.
- Collaborated with development teams to debug and deliver assigned features on schedule.
- Gained foundational exposure to SQL and relational database concepts.

Infosys

May 2022 – Sep 2022

Operations Executive | Mysore

- Completed enterprise workflow training; developed strong professional communication and cross-team collaboration skills within a large-scale corporate environment.

PROJECTS

ArcherReview — Healthcare Education & Exam Preparation Platform

An e-learning platform providing test preparation, Q-banks, assessments, and learning resources for nursing and medical professionals.

React.js | Next.js | TypeScript | Redux | REST APIs | Google APIs | Tailwind CSS

- Built a component-based frontend with a reusable component library to support rapid, consistent feature development.
- Implemented role-based user experiences with robust Redux state management.
- Enhanced performance using Next.js SSR/SSG rendering strategies, lazy loading, and frontend optimisation techniques.
- Delivered WCAG-compliant accessibility: keyboard navigation, screen-reader support, Dragon Speech compatibility, colour contrast, and stylus accessibility.
- Integrated Google APIs and SmartyStreets for US address and state validation, enabling accurate location-based data entry.
- Integrated backend services for authentication, course management, and reporting; optimised responsiveness and resolved cross-browser issues.

PulsedIn — Healthcare Professional Networking & Learning Platform

A micro-learning and professional networking platform connecting nurses with education, community, and career opportunities.

React.js | Next.js | TypeScript | Redux | REST APIs | Tailwind CSS

- Revamped Login and Signup flows with multiple state validations, improving form reliability and user experience.
- Performed Next.js package upgrades and component-level updates across the entire application.
- Integrated REST APIs for user profiles, community engagement, content sharing, and learning resources.

Gym Management Tracker

A full-stack gym management platform for efficiently managing members, schedules, billing, and daily operations through a centralized dashboard.

Next.js | Prisma | Supabase | PostgreSQL | TypeScript

Live: gym-management-tracker.vercel.app

- Built a full-stack gym management platform letting gym owners and staff run day-to-day operations — members, schedules, and billing — from one dashboard.
- Built end-to-end with Next.js, covering both the UI and server-side logic in a single codebase.
- Modelled and queried relational data with Prisma ORM on a Supabase-hosted PostgreSQL database.
- Implemented secure authentication and a protected, role-aware dashboard experience for gym staff.

EDUCATION

Ethiraj College for Women

2017 – 2020

Bachelor of Science – Mathematics with Computer Applications

CONTINUOUS LEARNING

- Working knowledge of Prompt Engineering and Context Engineering.
- Exploring Webflow for modern website development.
- Continuously upskilling in frontend design systems, accessibility standards, and performance optimisation.
