

KAVYA K

Frontend Developer • React.js • Next.js • TypeScript

kavyak6999@gmail.com | +91 8903184518 | linkedin.com/in/kavya-k-1b623918b | github.com/kavya-viji

PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 4 years of experience building web applications using React.js, Next.js, TypeScript, and JavaScript. Skilled in developing reusable UI components, integrating REST APIs, and managing application state with Redux. Proficient in accessibility (WCAG), performance optimisation via SSR/SSG, and cross-browser responsive development. Experienced in debugging and troubleshooting complex frontend issues across production applications. Actively integrates AI tools (Claude AI, Cursor) into daily engineering workflows to accelerate delivery, improve code quality, and support technical research - aligned with an AI-native engineering culture.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS

State Management: Redux, Redux-Saga

API Integration: REST APIs, Google APIs

Frontend Practices: SSR, SSG, Performance Optimisation, Accessibility (A11y / WCAG), Debugging & Troubleshooting, Responsive Web Design, Cross-Browser Compatibility, SEO

Methodologies: Agile, Scrum

Tools: Git, GitHub, npm, Yarn, Postman, VS Code, Cursor, CI/CD, Vite, Webpack, Vitest, React Testing Library

AI Tools: Claude AI, ChatGPT, Prompt Engineering, Context Engineering, Cursor, Gemini

PROFESSIONAL EXPERIENCE

TartLabs

May 2023 – Present

Frontend Developer | Coimbatore

- Develop and maintain B2C web applications using React.js, Next.js, TypeScript, and JavaScript (ES6+).
- Build and maintain a reusable component library, reducing repeated UI development and improving consistency across products.
- Ensure clean, maintainable code and consistent UI patterns across projects.
- Integrate RESTful APIs and third-party services with robust error handling; debug and resolve complex API integration issues in production.
- Manage application state using Redux and Redux-Saga; investigate and fix difficult state-related bugs and performance bottlenecks.
- Optimise application performance through SSR, SSG, and lazy loading — delivering faster, more reliable user experiences.
- Implement SEO enhancements using JSON-LD structured data and modern Next.js rendering strategies.
- Deliver full WCAG-compliant accessibility including keyboard navigation, screen reader support, Dragon Speech compatibility, colour contrast, and stylus accessibility.
- Debug and troubleshoot complex frontend issues, identifying root causes and delivering lasting fixes.
- Manage dependency upgrades using Yarn and npm; conduct code reviews and contribute to frontend technical decisions.
- Collaborate effectively with Product, Design, Backend, and QA teams across the full development lifecycle.
- Leverage AI-assisted development using Cursor and Claude AI to accelerate feature delivery, improve code quality, automate documentation, and support debugging — knowing when to trust AI output and when to apply independent judgement.

Fabevy

Oct 2022 – Apr 2023

Web Developer Intern | Chennai

- Developed responsive web pages using HTML, CSS, and JavaScript with a focus on cross-browser compatibility and clean, maintainable code.
- Built reusable frontend sections and optimised layouts for multiple screen sizes.
- Collaborated with development teams to debug and deliver assigned features on schedule.
- Gained exposure to SQL fundamentals and database concepts.

- Completed enterprise workflow training and developed professional communication and collaboration skills in a large-scale corporate environment.

PROJECTS

PulsedIn

React.js | Next.js | TypeScript | Redux | REST APIs | Tailwind CSS

- Revamped the application Login and Signup flows with multiple state validations, improving form reliability and user experience.
- Performed Next.js package upgrades and component-level updates across the entire application.
- Integrated REST APIs for user profiles, community engagement, content sharing, and learning resources.

ArcherReview

React.js | Next.js | TypeScript | Redux | REST APIs | Google APIs | Tailwind CSS

- Built component-based frontend with a reusable component library to support rapid, consistent feature development.
- Implemented role-based user experiences with robust Redux state management.
- Enhanced performance using Next.js SSR/SSG rendering strategies, lazy loading, and frontend optimisation techniques.
- Delivered full WCAG-compliant accessibility: keyboard navigation, screen reader support, Dragon Speech compatibility, colour contrast, and stylus accessibility.
- Built a standalone UI module using Tailwind CSS as part of a broader design system effort.
- Developed web page functionality and learning interfaces for courses, assessments, and progress tracking.
- Implemented email validation based on domain and TLD rules to ensure data quality and prevent invalid registrations.
- Integrated Google APIs and SmartyStreets for US address and state validation, enabling accurate location-based data entry.
- Performed Next.js package upgrades and maintained dependency health across the application.
- Integrated backend services for authentication, course management, and reporting.
- Optimised application responsiveness across devices; debugged and resolved cross-browser compatibility issues.
- Managed package installations and dependency upgrades using Yarn.

EDUCATION

Ethiraj College for Women

2017 – 2020

Bachelor of Science – Mathematics with Computer Applications

CERTIFICATIONS & CONTINUOUS LEARNING

- Completed Anthropic learning programs focused on Claude AI and AI-assisted development workflows.
- Working knowledge of Prompt Engineering and Context Engineering.
- Vitest and React Testing Library for frontend testing.
- Exploring Webflow for modern website development.
- Continuously upskilling in frontend design systems, accessibility standards, and performance optimisation.
